

Press Release 06/02/2015

Videcom Security receive environmental recognition

Coming up to their 30th anniversary leading Essex based national Public Space CCTV and Security Systems Installer Videcom Security have recently obtained their ISO 14001 accreditation in recognition of their environmental policies.

ISO 14001 is an internationally accepted standard that outlines how to put an effective environmental management system in place. It is designed to help businesses remain commercially successful without overlooking environmental responsibilities. It can also help you to grow while reducing the environmental impact of this growth. An ISO 14001 system provides the framework to allow you to meet increasingly high customer expectations of corporate responsibility as well as legal or regulatory requirements.

Videcom, who have been based in Waltham Abbey, Essex for over 20 years have had the opportunity over the past 2 years to invest in new premises infrastructure, company vehicles and procedures and have developed within their framework key environmental policies encouraging energy efficiency through design, waste management, recycling and cost benefit through commitment.

The accreditation process has enabled Videcom to implement new corporate policies and procedures and has led to significant company cost benefits with reduced energy costs combined with reductions in vehicle fuel, waste transfer costs and premises overheads.

The benefits achieved enable Videcom to be more competitive and pass on cost savings to our existing and future clients. Our Green CCTV design and sales policies are helping drive down system running costs and reducing the effects of CCTV within our environment.

“ISO14001 highlights the professional services we provide to our clients reflected in our internal processes, procedures and culture within our business. The accreditations represent a process of continual improvement for our business. Videcom are continuing to develop their procedures and policies to continue to reduce the impact they have on their environment and in the communities in which they work.” Ron Johnson Managing Director.

Editors Notes:
