

ABOUT VIDECOM

Videcom Security are an experienced and successful CCTV and Access Control installation and maintenance company working with Municipal authorities, Blue Chip industrial customers, Housing Associations, Schools and Colleges. We continue to build strong business relationships based upon a first class service and technology resource.

Videcom have been designing, installing commercial security and surveillance solutions for nearly 30 years and work with a variety of manufacturers including Bosch, LG, Panasonic, Pelco and Samsung. However our knowledge and skills are in no way limited to these manufacturers. Extensive knowledge of other leading brands as well as excellent spares holding, have been built up over the years.

Videcom have also designed and installed Wi-Fi and Network based communication systems for over 11 years - originally as the basis of distributed ANPR systems. Digital and high definition IP CCTV is now mainstream with analogue CCTV being slowly withdrawn from market. Videcom are a major digital CCTV specialist with a dedicated Digital Systems Manager and Microsoft Certified engineers.

In-house electronic and software design capability and has resulted in the development of our VNR range digital Hybrid CCTV Network Video Recorder, supporting advanced video analytics including ANPR. The Videcom VNR is an enterprise solution capable of working as a multi-site CCTV system including integration with legacy analogue control systems.

Videcom own and operate their own fleet of access platforms including 2 truck mounted units and 5 trailer mounted units with a reach of up to 17 Meters.

Our low emission, engineer vehicles are equipped with the tools and test equipment necessary to maintain CCTV, Access Control and large WI-Fi Networks.

All engineering personnel hold the current necessary training Certificates for New Street Works & Signing Act, safe Hydraulic Plant operation including engineers that are NICEIC Competent & Certified.

The Company, an equal opportunities employer, very proud of their in-house technical skills, staff retention and commitment to deliver a service beyond expectation.

We have in-house software and component level engineers online and on-call to deliver and service our security portfolio.
