Transportable network ready 3G
WI-FI CCTV

Now available from Videcom. A range of 2 Mega Pixel HD CCTV cameras designed primarily for stand-alone remote applications. Based on the award winning LG 2MP IP cameras we are able to offer various internal and external CCTV solutions connected either over broadband or GSM Mobile networks. Part of the Cluster Cam Family.

How it works

The CCTV camera assembly is installed and connected to a local 240 volt supply or temporary battery.

The cameras can be fitted with either an internal SD card or external recorder, for direct recording with rates up to 25 ips and resolutions up to 1920 x 1080 per camera.

If a local network or broadband connection is available the camera can be connected and configured for remote viewing, download, email and FTP. The unit can also be connected to a 3G mobile router for true transportability, this option also allows for download to wireless connected secure laptop.

Re Deployable
Transportable
Single external power connection
Wi-Fi & 3G built in
External 3G aerial
USB storage disk
Stainless Steel enclosure
Remote camera setup
Remote Live Viewing
Pan/Tilt/Zoom/Focus

Cost excludes airtime, 3G connectivity depends on camera location and other sources of interference.

Web Access

Simple playback of still image sequences is available via internet explorer, Firefox, chrome and Apple iPad Safari.

Live image web viewing is restricted to internet explorer only as it utilises Microsoft ActiveX technology.

SceneVu Live

Street Cam Live is a windows based application that works with the central FTP image storage server and ActiveX controls to provide a simple to operate user interface for the live viewing and replay of the camera feeds.

SceneVu Live includes :

- Live image display in full or quad screens
- Replay of still image sequences
- Replay of Cameras storage disks
- System configuration pages
- Built in html editor for ActiveX page editing
- System Audit Trail.

SceneVu live is a multi-user application allowing multiple and simultaneous viewing of both live and recorded streams.
